**Investment Objective:** To provide the highest level of long term return consistent with an emphasis on retirement income generation, protection against inflation and lower relative risk.

**Investment Strategy:** Invests in a diversified combination of mutual and separately managed funds using an asset allocation strategy uniquely designed for investors retiring around the year 2020. This fund will gradually become more conservative as the target date approaches.

**Investment Risk:** While an asset allocation strategy can be a good tool to reduce portfolio volatility, all investments are subject to risk. This includes the PCA Target Retirement Funds. PCA 2020 - PCA Harvester hold most of the underlying assets in fixed income investments. These funds are designed to generate income with lower relative risk compared to longer dated target funds. However, these funds are sometimes subject to periods of share price fluctuations. Those who are unwilling to accept price volatility should invest in a fund that guarantees a fixed level of income.

### Target Fund Illustration:

At the target date of 2020, the asset mix in this fund is anticipated to be approx. 60% bonds. As illustrated in the Equity Glide In this chart, the asset mix will progressively reduce stock exposure and become more conservative until 2030, when it will become fixed at 24% stocks and 76% bonds.

### Target Fund Description:

PCA Target Retirement Funds are designed to provide the maximum level of investment assistance for participants who have little interest, time or experience investing in the financial markets. The attraction of the funds is that on-going investment decisions are turned over to an experienced portfolio management team. Its goal is to create a portfolio that is properly diversified and adequately reflects the risk for an investor’s current stage of life. Target Funds with dates far out in the future are designed to be more aggressively invested. Over time the fund will gradually become more conservative as investors approach their retirement date and beyond.

To assist our ministry partners, PCA Retirement & Benefits, Inc. (RBI) has designed twelve Target Retirement Funds that reduce the responsibilities of maintaining a portfolio. Each fund has a number within the target fund name (e.g. PCA 2060). This number refers to the approximate year a participant can expect to retire and begin to gradually withdraw the value of their account in retirement.

The professionals at RBI regularly monitor and adjust each PCA Target Retirement Fund to provide investors with greater stability and reduced risk. To select the correct Target Fund for you, simply pick the fund that is closest to your anticipated retirement year, and then let the experts at RBI do the rest.
