Investment Objective: To provide the highest level of long term return consistent with an emphasis on retirement income generation, protection against inflation and lower relative risk.

Investment Strategy: Invests in a diversified combination of mutual and separately managed funds using an asset allocation strategy uniquely designed for investors expecting to retire around the year 2055. This fund will gradually become more conservative as the target date approaches.

Investment Risk: While an asset allocation strategy can be a good tool to reduce portfolio volatility, all investments are subject to risk. This includes the PCA Target Retirement Funds. PCA 2065 - PCA 2035 hold most of the underlying assets in equities and therefore have the potential to earn a high rate of return. However, these funds are sometimes subject to prolonged periods of significant share price fluctuations. Those who are unwilling to accept price volatility should invest in a more conservative allocation with a corresponding lower expected return.

Target Fund Illustration:

At the target date of 2055, the asset mix in this fund is anticipated to be approx. 60% bonds. As illustrated in the Equity Glide Path chart, the asset mix will progressively reduce stock exposure and become more conservative until 2065, when it will become fixed at 24% stocks and 76% bonds.

Target Fund Description: PCA Target Retirement Funds are designed to provide the maximum level of investment assistance for participants who have little interest, time or experience investing in the financial markets. The attraction of the funds is that on-going investment decisions are turned over to an experienced portfolio management team. Its goal is to create a portfolio that is properly diversified and adequately reflects the risk for an investor's current stage of life. Target Funds with dates far out in the future are designed to be more aggressively invested. Over time the fund will gradually become more conservative as investors approach their retirement date and beyond.

To assist our ministry partners, PCA Retirement & Benefits, Inc. (RBI) has designed twelve Target Retirement Funds that reduce the responsibilities of maintaining a portfolio. Each fund has a number within the target fund name (e.g. PCA 2060). This number refers to the approximate year a participant can expect to retire and begin to gradually withdraw the value of their account in retirement.

The professionals at RBI regularly monitor and adjust each PCA Target Retirement Fund to provide investors with greater stability and reduced risk. To select the correct Target Fund for you, simply pick the fund that is closest to your anticipated retirement year, and then let the experts at RBI do the rest.

Fees and Expenses:

(1 Year As of 6/30/2021)
Plan Administration 0.36%
Total Investment Management 0.58%
Total Expense Ratio 0.94%

Benchmark Description:
The 2055 Custom Benchmark was created by applying a series of broad market indexes to the fund’s asset allocation. The benchmark is currently made up of 35% Russell 1000, 11.5% Russell Mid Cap, 11.5% Russell 2000, 10.5% MSCI EAFE ex-US, 10.5% MSCI EAFE Index, 7% MSCI Emerging Mkts Index, 5% MSCI Pacific ex-US, 2% Bloomberg Aggregate Index, 2% JP Morgan Global Bond Fund and 4.25% NFI-ODCE + .75% MSCI US REIT Index. The 2055 Custom Benchmark will change over time along with the fund’s asset allocation.
