Product	Group	Rate per hundred of compensation. See example on reverse side for how to calculate LTD premium.									
LTD 1	Enhanced	\$ 0.744	Due to the insurance carrier's underwriting requirements, it is the Employer's option and/or decision to provide disability as LTD1, LTD2, or LTD3, or to include Short Term Disability with the Long Term Disability as LTD5, LTD6, or LTD7. Who gets what plan is decided by the employer, not the employee. LTD may be made available for enrollment either to all full-time staff or for a certain group or class of employees. The Insurance Adoption Agreement is used to establish the eligible group for the church or organization. See information on the back of this sheet for more LTD details and an example for calculating an LTD premium.								
LTD 5	Enhanced with Short Term	\$ 1.272									
LTD 2	Basic	\$ 0.566									
LTD 6	Basic with Short Term	\$ 1.095									
LTD 3	Voluntary	\$ 0.727									
LTD 7	Voluntary with Short Term	\$ 1.600									
The Insurance Adoption Agreement (IAA) is the document we provide for you to establish your church or organization as a participating Group and to communicate which PCA Group Insurance plans will be offered to your full-time staff (those working 30 or more hours per week). Please call our office or email insurance@pcarbi.org with your request. You may update benefits offered by submitting an updated IAA, if needed.

Example

A pastor makes \$75,000 in taxable compensation of \$50,000 plus \$25,000 in non-taxable housing allowance. The rate is based on the combined total compensation and housing of \$75,000. He is provided with LTD 1 Enhanced coverage and these numbers are in the sample calculation.

Premium Calculation:

$\$75,000 / \$100 = 750$ (to obtain 'hundreds' of compensation)

$750 \times \$0.744 = \558 per year or $\$46.50$ per month
